

Silikal coating for the "Nordsee" Restaurant  
in the "Mittelrhein-Forum" shopping centre  
in Koblenz/Rhine, Germany

Expect more from your floor.

# NORDSEE

## Attractive base with coloured quartz broadcast

Fast food, fast floor... The new floor for the "Nordsee" fish restaurant in the new "Mittelrhein-Forum" shopping centre in Koblenz was completed in a short time. In just one weekend the kitchen and sales areas were given a coating of Silikal reactive resin.

The chic silver-grey background colour with broadcasted quartz in black and light grey creates a smart and appealing look. The quartz also creates a slightly

rough surface texture, which ensures a safe non-slip surface for the daily foot traffic through the fast food restaurant.

The entirely seamless, low-maintenance Silikal floor is resistant to many aggressive substances, such as fats, oils, salts, acids and alkalis. It also impresses with its scratch-resistant and hard-wearing properties and is impervious to temperature fluctuations.

*Skillfully applied by qualified installers and the new floor is fully cured and ready for action within one hour. A perfect way to keep your operation running wide open.*

**Expect more from your floor.**
